Give us a blurb about a story on page 2. Tell us what to expect and what the headline is.

Preface

Give us a blurb about a story on page 3. Give a quote from the story to get interest.

Acknowledgement

Give us a blurb about a story on page 4. Make this your own!

HR MANAGEMENT SYSTEM

A HIGHER HR SOLUTION

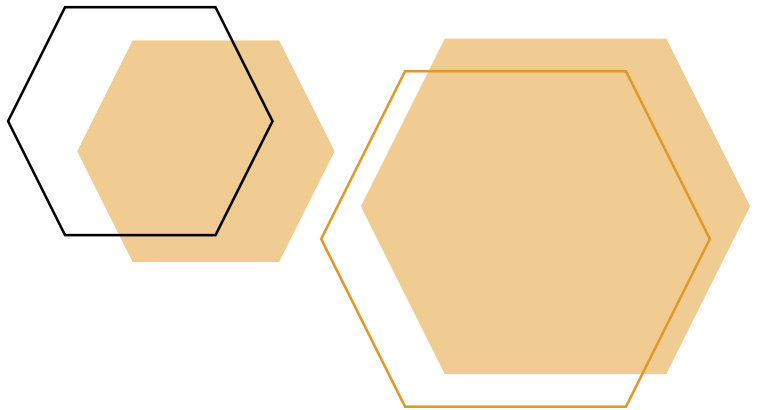

Human Resource Information Systems provide a means of acquiring, storing, analyzing and distributing information to various stake holders. The function of the human resources department involves tracking employee histories, skills, abilities, salaries, and accomplishments. Replacing certain processes with various levels of HRMS, system can distribute information management responsibilities so that the bulk of information gathering is not delegated strictly to HR. By allowing employees to update personal information and perform other tasks, information is kept more accurate and HR professionals are not bogged down.

And More >>

CERTIFICATE

This is to certify that this project entitled “**HR Management System**” submitted in partial fulfillment of the ACCP EE-201804F Semester-2 done by following candidate.

Muhammad Jazzel Mehmood

ACKNOWLEDGMENT

I am very thankful to ALMIGHTY ALLAH that by His Grace we have been successful.

I am presenting my application (I-Project) I have tried my best to take all relevant and
Necessary topics into our consideration so that this project may become
Comprehensive.

This is my Semester-2 I-Project. I have strived for a better outlook to come. This
Project has been developed in .Net WinForms.

I would like to thank Sir Hassan Awan for his guidance and for giving us time from
His busy schedule.

I also express our sincere gratitude to I-Project team from Aptech (MSG)
For their valuable guidance and support for the completion of this project.

I earnestly hope that this project will provide all the necessary information required
By the user to fulfill his/her inspiration. However, suggestion and feedbacks for
Improvements will be thankfully welcomed & acknowledged.

Thank You.

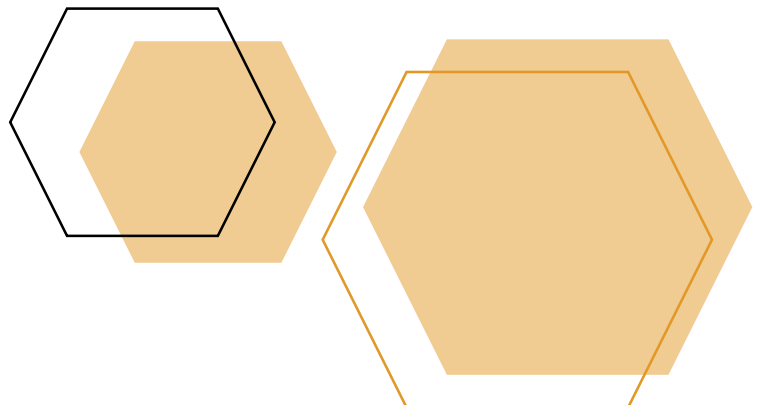

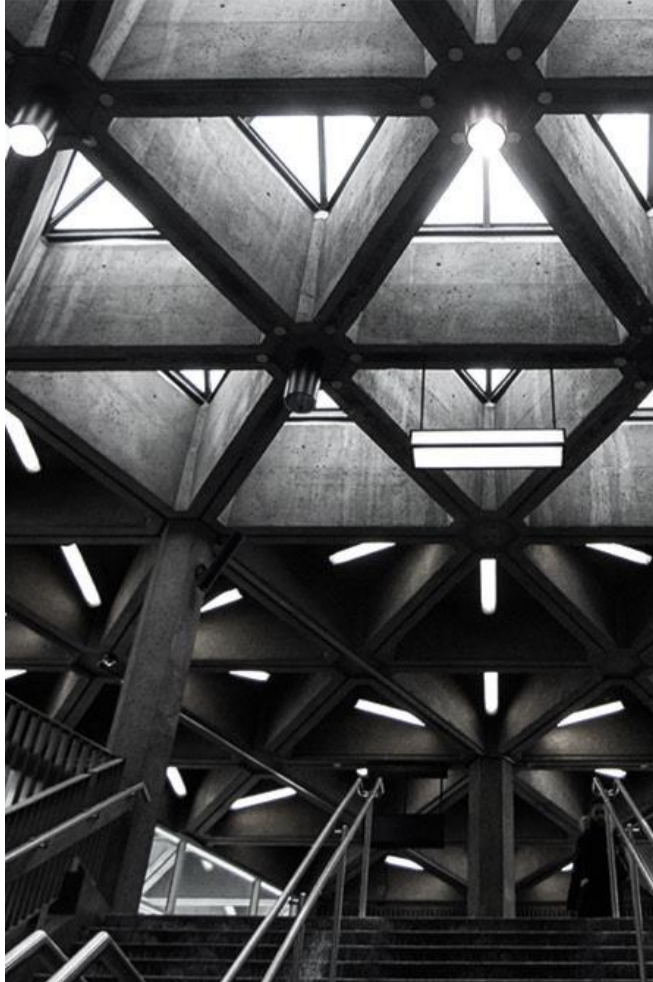

REQUIREMENT SPECIFICATIONS

PROBLEM STATEMENT

'*HR Management System*' is a **Human Resource Management System** or HRIS (Human Resource Information System) is a form of HR software that combines a number of systems and processes to ensure the easy management of a business' employees and data.

Human Resource Information Systems provide a means of acquiring, storing, analyzing and distributing information to various stake holders. The function of the human resources department involves tracking employee histories, skills, abilities, salaries, and accomplishments. Replacing certain processes with various levels of HRMS, system can distribute information management responsibilities so that the bulk of information gathering is not delegated strictly to HR. By allowing employees to update personal information and perform other tasks, information is kept more accurate and HR professionals are not bogged down.

REQUIREMENTS SUMMARY

Functionality performed by Project Human Resource Management System:

- Login for Admin
- Forgot password For Admin
- Edit profile For Admin
- Change password For Admin
- Logout Functionality
- Dashboard for Admin User

Manage Employee

- Adding New Employee
- Edit the Existing Employee
- View Details of the Employee
- Listing of all Employee

Manage Attendance

- Adding new Attendance
- Edit the existing Attendance
- View details of the Attendance
- Listing of all Attendance

Manage Salary

- Adding new Salary
- Edit the existing Salary
- View details of the Salary
- Listing of all Salary

Reports the Project Human Resource Management

- Report of all Employees
- Report of all Attendance
- Report of all Salary

HARDWARE/ SOFTWARE REQUIRED

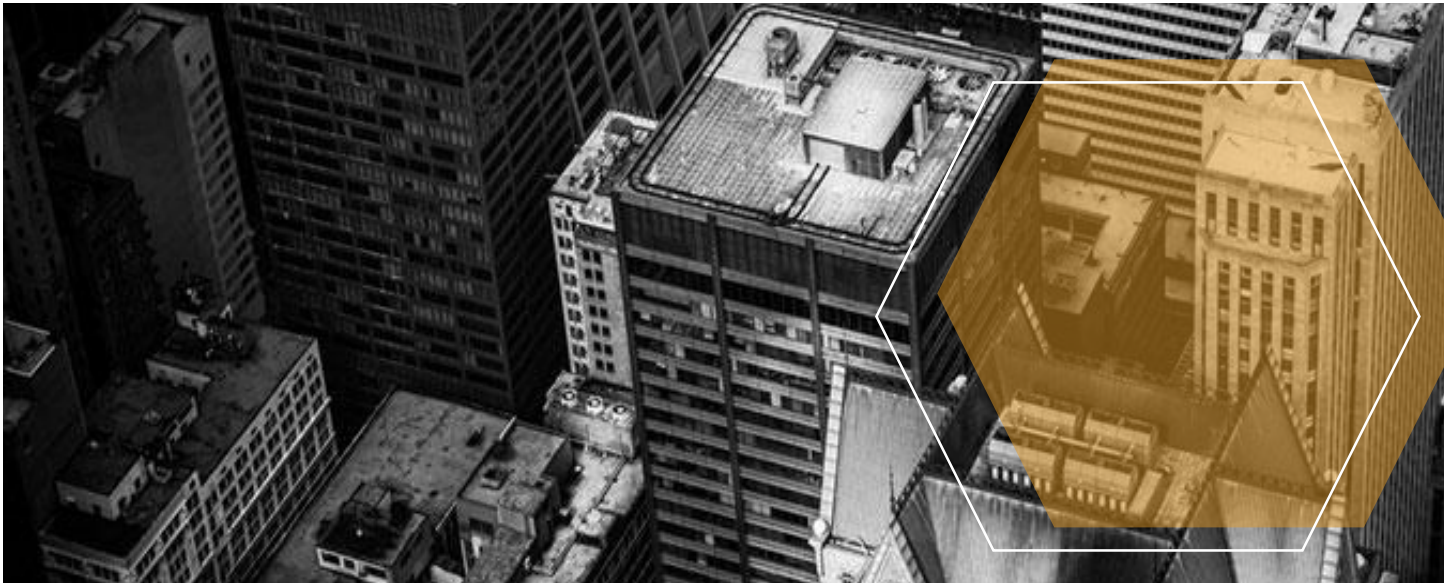

HARDWARE

- A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better
- 64 Megabytes of RAM or better
- Windows 7,8 (or higher if possible)

SOFTWARE

Either or combination of the following Software's are to be used:

- Visual studio C# sharp
 - SQL Server (Database)
-

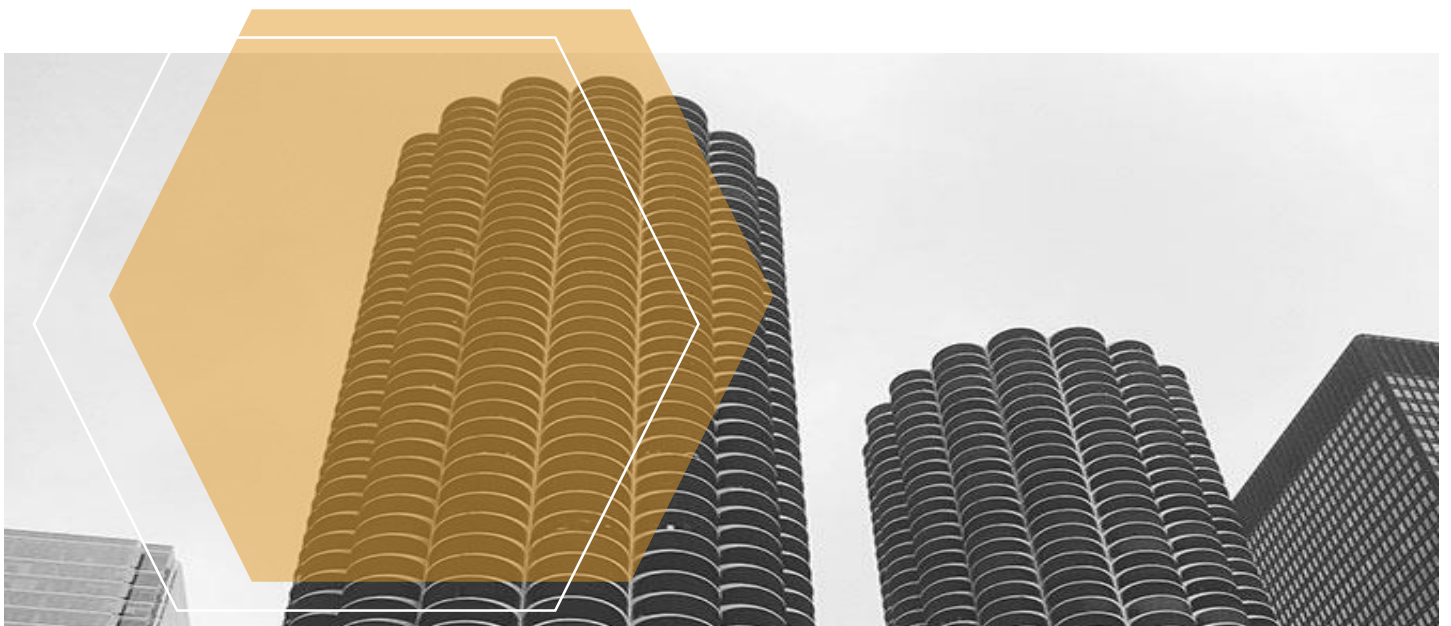

PROPOSED SOLUTION

Human Resource Information Systems provide a means of acquiring, storing, analyzing and distributing information to various stake holders. The function of the human resources department involves tracking employee histories, skills, abilities, salaries, and accomplishments. Replacing certain processes with various levels of HRMS, system, can distribute information management responsibilities so that the bulk of information gathering is not delegated strictly to HR. By allowing employees to update personal information and perform other tasks, information is kept more accurate and HR professionals are not bogged down.

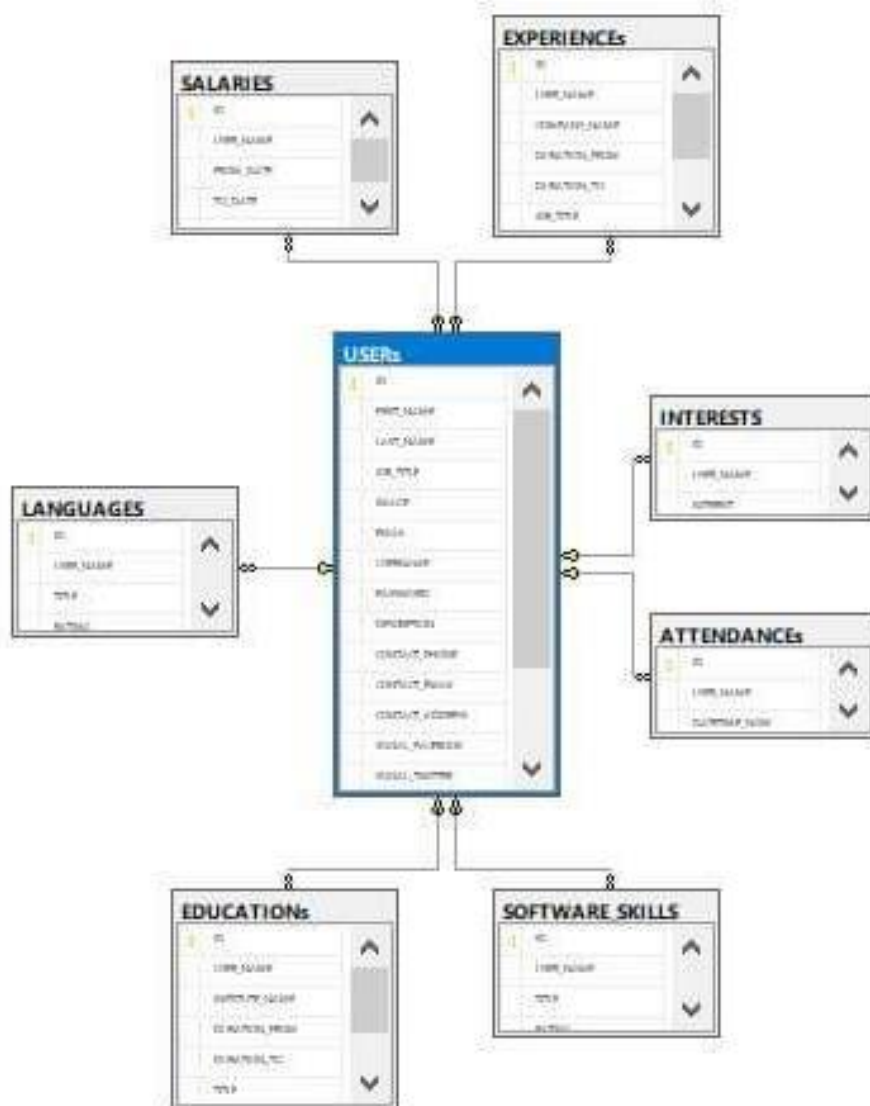

The system will help company go document free. All the data of employees, users and their salaries will be stored in the database and in the form of structured data that will be easier to read and more reliable.

Also, the data can also be exported in the form of reports.
